

Hydraulic High Pressure Washer

HL-KB2X41

This hydraulic high pressure washer includes two high pressure water pumps which delivers 40l/min each at 140 bar. Piping and cabinet is made of stainless steel. See-through splash guard in front.

The users can be connected to the same outlet. The HP unit will adjust waterflow automatically and is not sensitive to nozzle and lance variations.

This unit is low maintenance and very reliable.

Can be used with seawater and temperatures up to 45°C. Can run higher temperatures by changing the water seals. We can make special HP units on request.

Technical data:

Water Pressure:	80-140bar
Water flow:	10-80 l/m
Water temperature:	5-45°C
Min. oil pressure:	170 bar
Max. oil flow:	120 l/m
